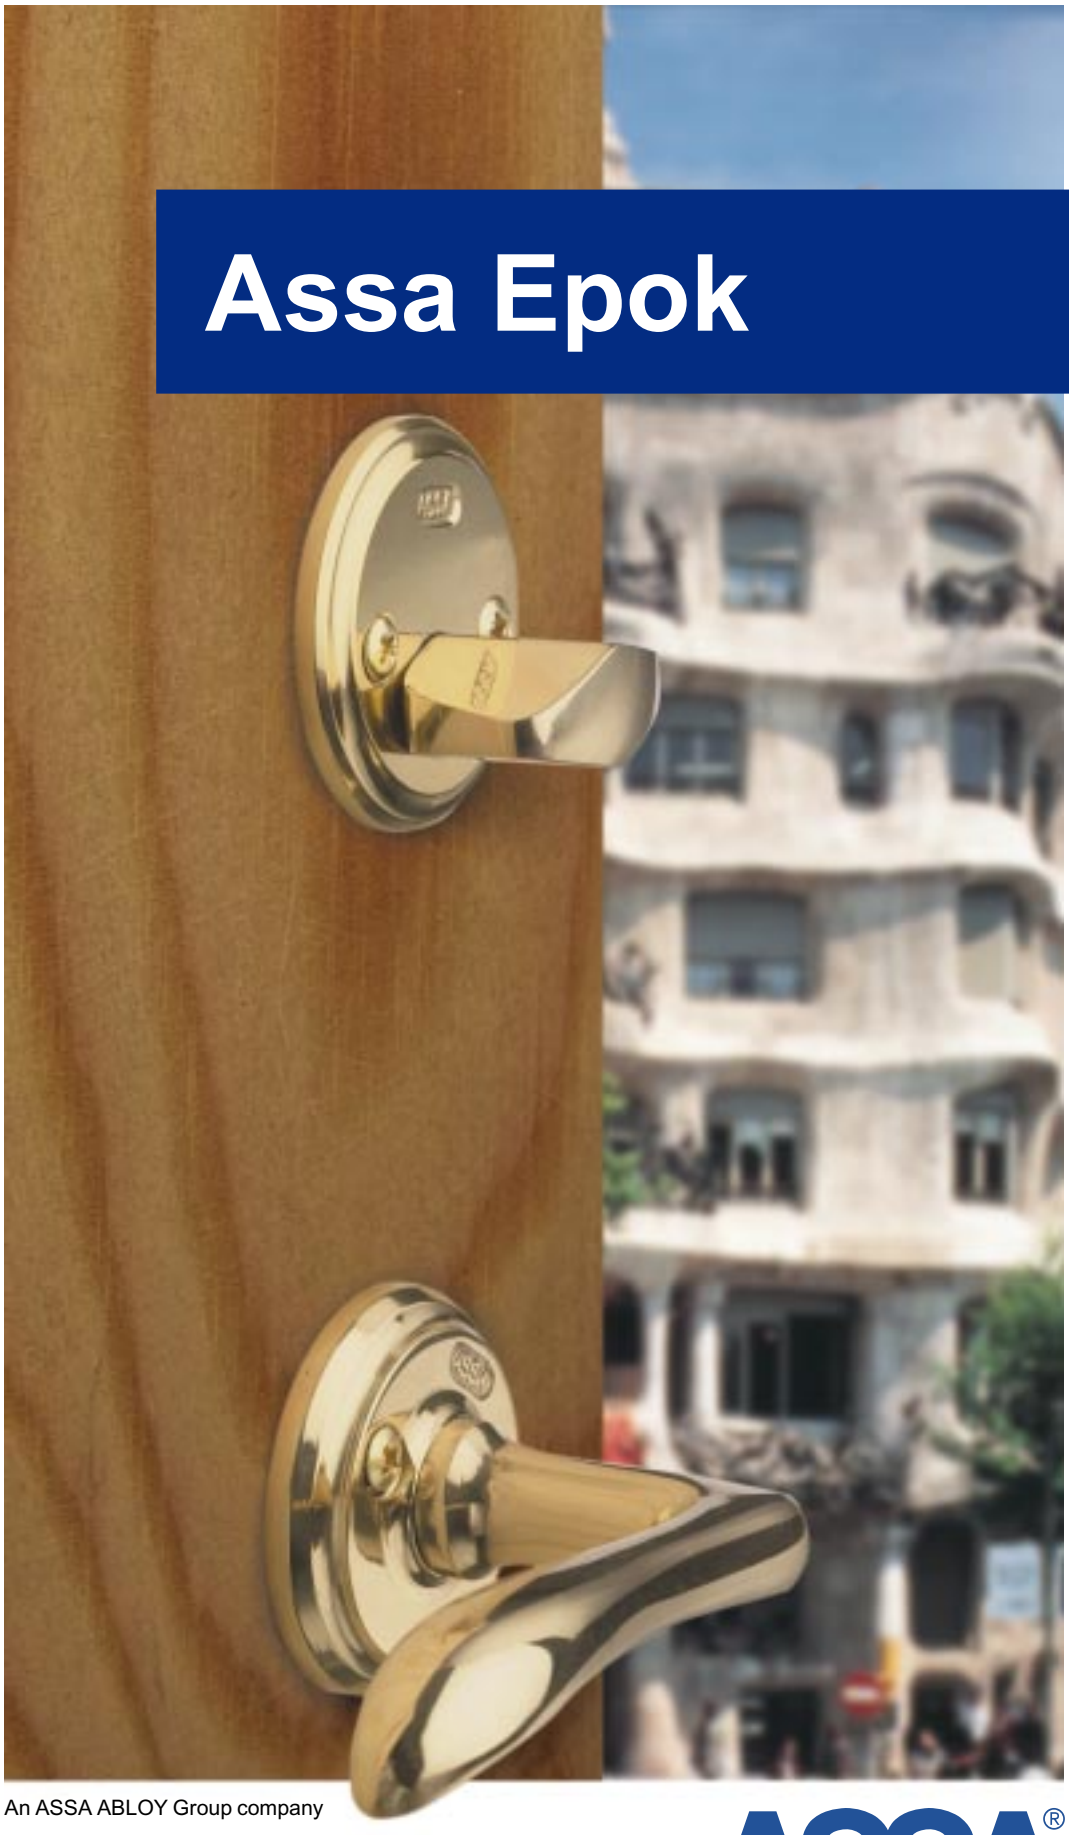
Assa Epok



An ASSA ABLOY Group company

ASSA®

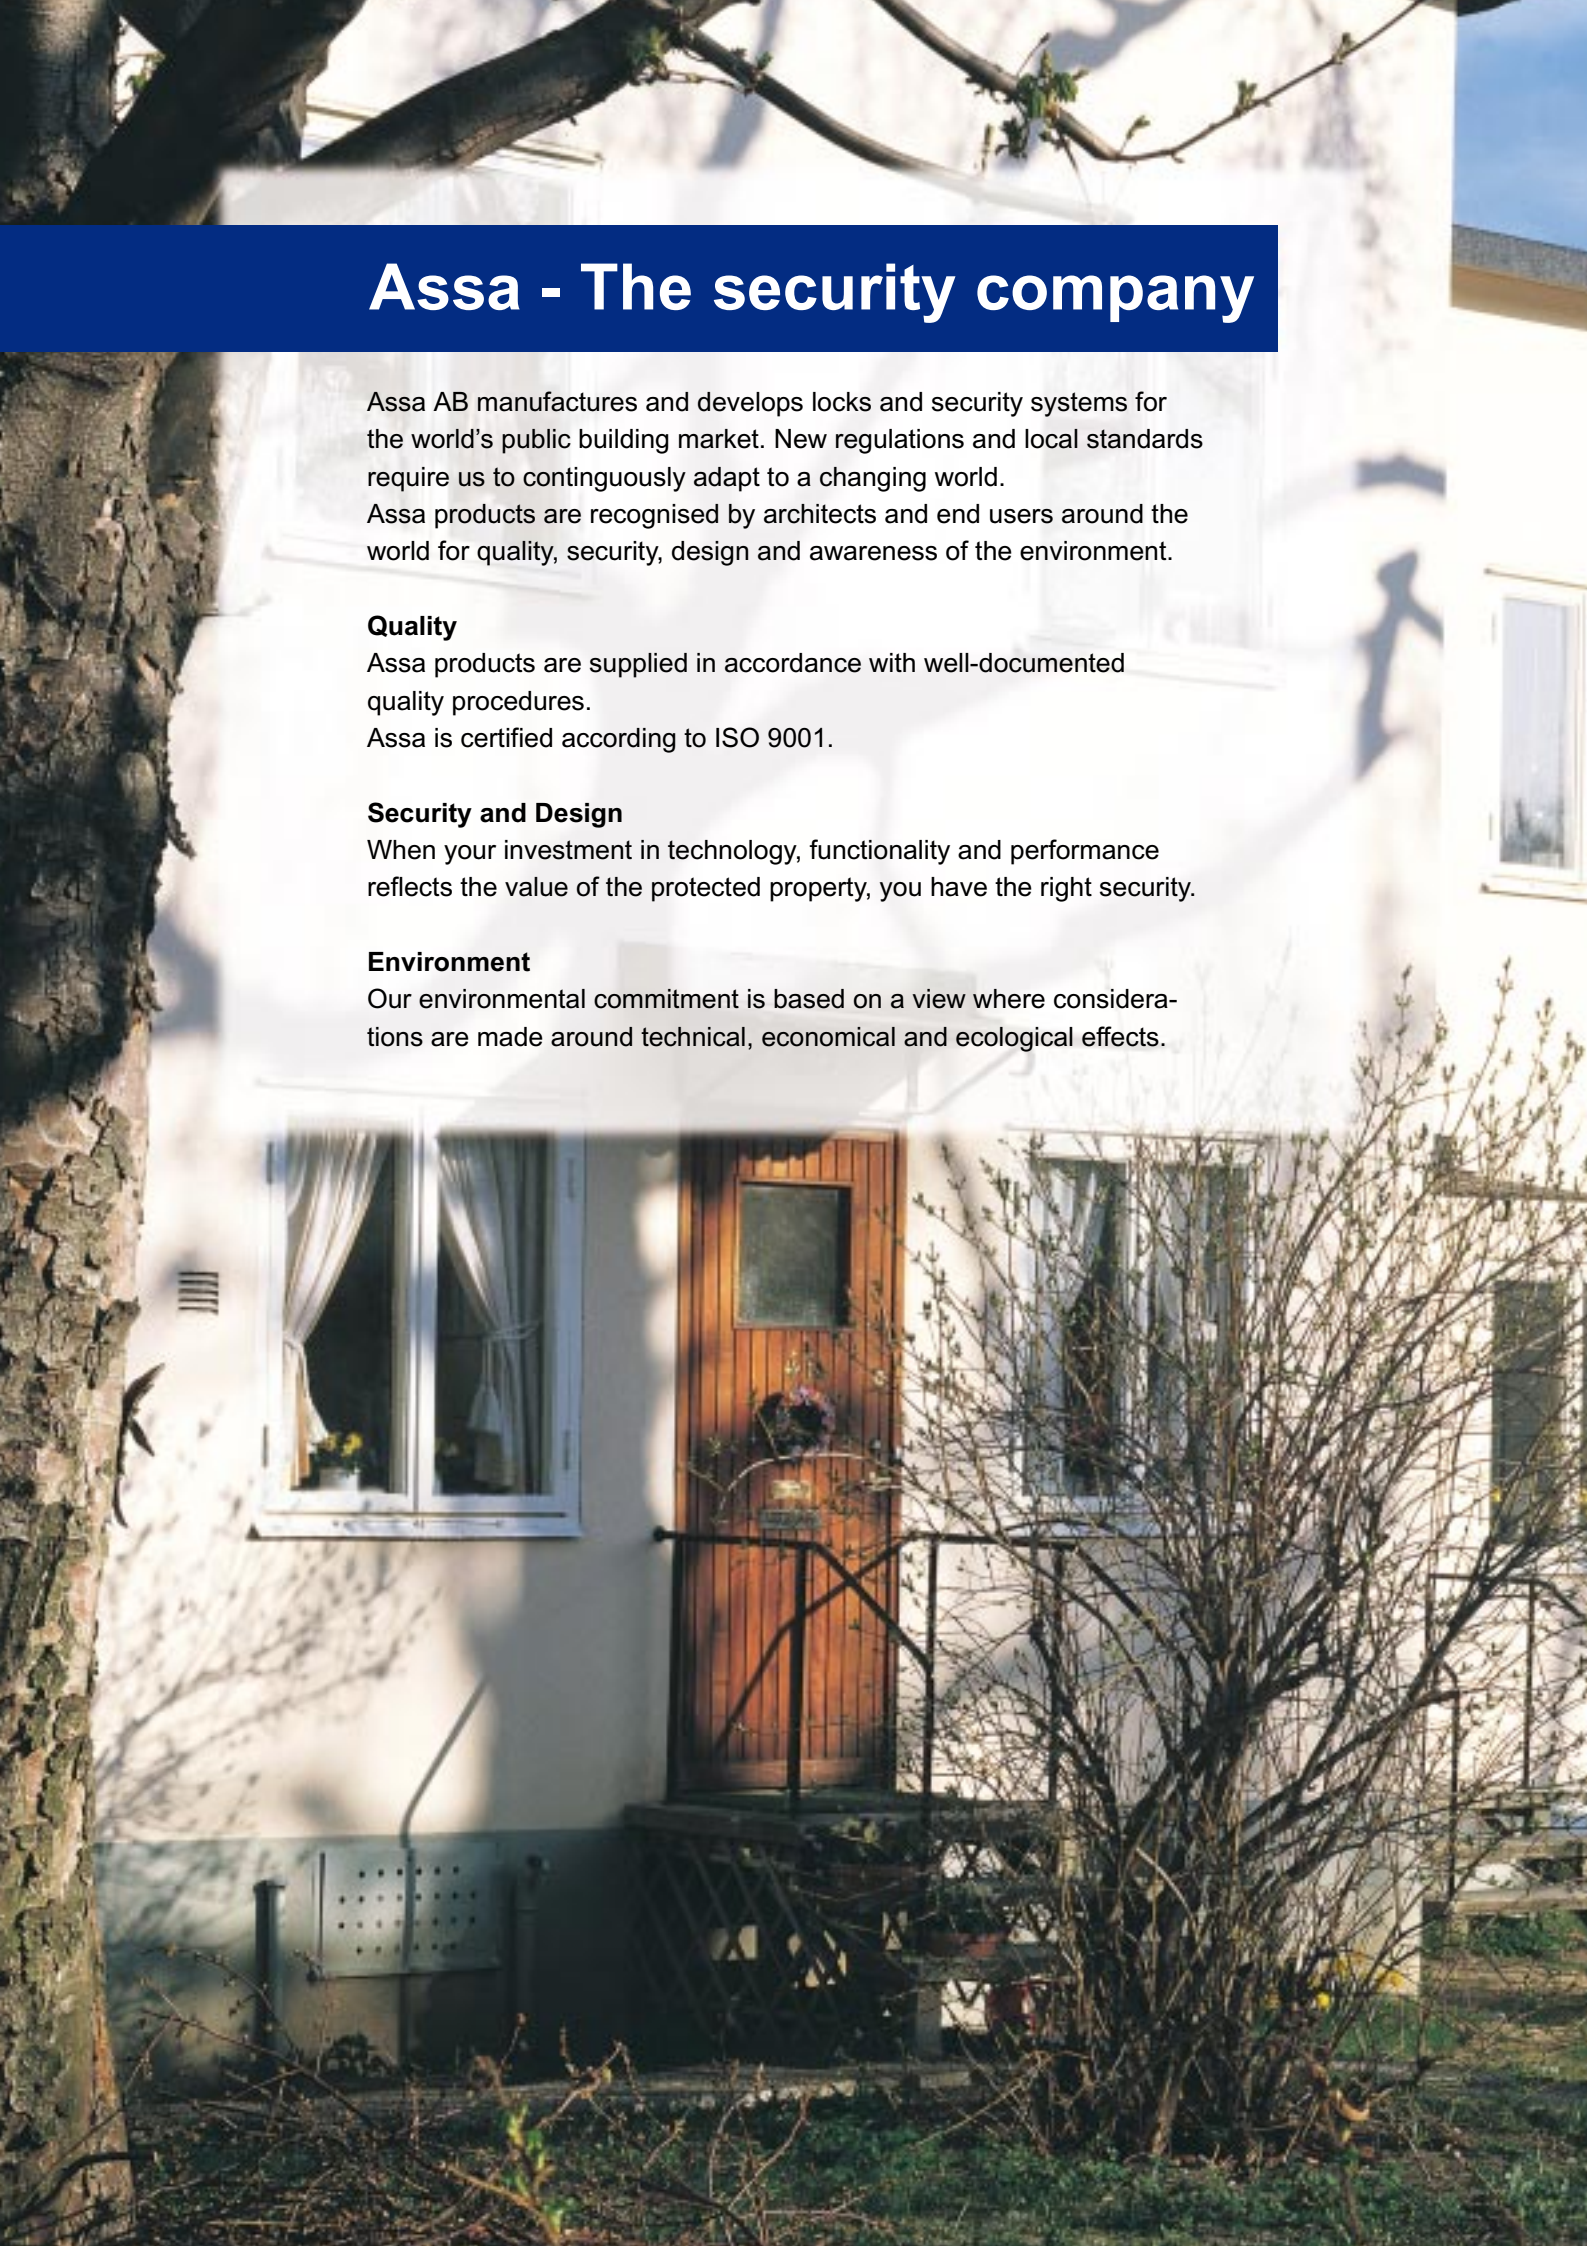
Assa - The security company

Assa AB manufactures and develops locks and security systems for the world's public building market. New regulations and local standards require us to continguously adapt to a changing world.
Assa products are recognised by architects and end users around the world for quality, security, design and awareness of the environment.

Quality
Assa products are supplied in accordance with well-documented quality procedures.
Assa is certified according to ISO 9001.

Security and Design
When your investment in technology, functionality and performance reflects the value of the protected property, you have the right security.

Environment
Our environmental commitment is based on a view where considerations are made around technical, economical and ecological effects.



Epok - idea to Epok

”I find it important that the overall impression of a building match with the details. Our idea with the Epok series is therefore to assist architects with accessories for different architectural designs.”

Pelle Wester
Designer

Assa Epok

”The spiritual influences during the last decades of the 1900-century gave new inspiration all over Europe.
The anticipation was big and no one knew if this would result in a new art,
human being, moral or even a new order in society.”
Robert Musil
